CROCODILES <input type="checkbox"/> Nile crocodile																1
MINIMUM REQUIREMENTS: Copper-17, Bronze-26, Silver-49, Gold-61, Diamond-80 There is a slightly different entry procedure for SCI Animals of Africa. In most other Inner Circles, you may enter any combination of eligible animals listed to arrive at the required minimum number. For Animals of Africa, you must have taken the specific animals listed in each column to qualify for that particular Inner Circle level. For example: to enter at the Bronze level, 26 animals are required. Under the column heading "Bronze" you will find the animals grouped into categories. The number in the Bronze column tells you how many varieties in that particular group are required. You must have all the 26 animals listed in that column to qualify for the Bronze Circle.																
* From Namibia, South Africa or Zimbabwe under CITES quota ** Under certain conditions *** May be darted **** From native habitat in country of origin ***** Now accepting record book entries Note: Nubian ibex and aoudad (Barbary sheep) are not required but, if taken in native habitat, can substitute for any other animal. Water chevrotain is not required but can be substituted for any pygmy antelope, dik-dik, or duiker.
